Full Description

JLG 1200SJP Telescopic Boom Lift — Rental

The JLG 1200SJP is a high-reach telescopic boom lift designed for demanding access work where distance, stability, and efficient positioning matter. It is well-suited for outdoor job sites that require dependable performance in construction, industrial maintenance, and large-scale facility operations.

Typical Rental Applications

- Steel erection and structural works
- Façade installation, glazing, and cladding
- MEP installation and high-level maintenance
- Refineries, plants, and industrial shutdown support
- Warehouses, yards, and large outdoor facilities

Key Advantages

- Telescopic boom design for direct access and long outreach
- Strong maneuverability for positioning in wide, open work areas
- Platform controls designed for smooth, precise movements
- Rugged construction for repeated use in tough site conditions
- Suitable for a wide range of attachments and site operating practices (as approved)

Safety and Operational Notes

Operator training and a pre-use inspection are essential before each shift. Always follow site lift plans, ground bearing assessments, and safe work procedures. Use appropriate PPE, maintain exclusion zones, and comply with the manufacturer's operating instructions and local regulations.

Rental Support

We can provide delivery and collection, operator support (where applicable), and flexible rental terms for short and long projects. Share your working area conditions, access restrictions, and required timeline so we can recommend the best configuration and mobilization plan.
